

Electrical Inspections

Assurance of Electrical Compliance

Acting as an agent for, or representative of, the customer, *Dynamo Electric* can provide a due diligence assurance that your projects are examined for compliance in project specifications, tender documents and applicable codes. Any discrepancies or deviations are noted and recommendations are put in place.

Some examples of electrical inspections are:

- ✓ New or modified installations of various electrical equipment including high voltage, communication, and control systems.
- ✓ Existing electrical works.
- ✓ Damaged power supply services, fire damage, vacant premises.
- ✓ Installations of fire alarm and emergency systems.
- ✓ Factory and field assembled electrical equipment.
- ✓ Wiring methods for energy efficient systems.
- ✓ Verify that electrically approved equipment is supplied.
